

ABSTRACT OF THE DISCLOSURE

A system for collecting bio-waste material is provided. The system includes a plurality of collection receptacles associated with a structure, each of the plurality of collection receptacles receiving the bio-waste material without the use of water as a carrier. A transport network extends from each of the plurality of collection receptacles to at least one storage receptacle located at the structure. A plurality of electromechanical carts are disposed within the transport network and automatically collect and package the bio-waste material to form packaged bio-waste material.
